tes

User stories Release 1 (MVP)

open the
flagged case
for
investigation

Add basic AI-
assisted case
summary to
R1

quickly
understand
why case
was flagged

Evidence
consolidated
in one place

Display risk
indicators

Analyst
determines
whether
evidence is
sufficient

Analyst can
manually
request
additional
information

view newly
added
information to
review the
case again

Record whether
to dismiss or
escalate a case
to make a next
follow-up action

Analyst
manually
records
rationale

Record evidence,
timestamp,
reason for
decision, so that
the decision can
be traceable

Want a audit
trail in a
chronological
order for
traceability

want to access
case information
and supporting
evidence for
further review

so that further
investigation
can be done by
appropriate
reviewers

so that
resolved cases
are clearly
identified
